### **Systems Analysis, Spacecraft Control, Data Processing, and Telemetry Systems. Earth Remote Sensing**

Technology for Additional Testing of Onboard Equipment at the Orbital Station <i>Ageev M. M., Erokhin G. A., Zhukov A. A., Tyulin A. E., Khromov O. E., Yudanov N. A.</i>	3
Temperature and Methods of Temperature Observations by Means of Optoelectronic Equipment for Earth Remote Sensing Space Systems <i>Gektin Yu. M., Zorin S. M., Askerko M. V., Trofimov D. O.</i>	11
An Approach to Studying the Planning Process for Using the Results of Space Activities <i>Antonova A. A.</i>	22
Prospects for the Use of Machine Learning Methods to Analyze the State of Multi-Satellite Constellations According to Telemetry Information <i>Golovanov S. V., Yanchenko A. A.</i>	31

---

### **Space Navigation Systems and Devices. Radiolocation and Radio Navigation**

Current Status and Prospects for the Development of Methods for Determining the Motion Parameters of Low-Orbit Spacecraft with a High Accuracy <i>Voronetsky S. V., Zaichikov A. V.</i>	41
Task of Autonomous Orientation of Orbital Spacecraft <i>Abezyaev I. N., Velichko P. E., Palkin M. V., Potselovkin A. I.</i>	52

---

### **Radio Engineering and Space Communication**

Estimation of Throughput Capacity of “Luch” Relay Satellites to Control Low Orbit Spacecraft in S-Band Frequencies <i>Zhodzishsky A. I., Kraskov V. V., Leonov M. S., Ryabogin N. V.</i>	60
Coherent Addition of QPSK Signals from Spaced Antennas with Complex Frequency Down-Conversion <i>Vatutin S. I., Kozin P. A.</i>	71
Considering the Influence of Parasitic Components in the Design of the K-Band Space Equipment <i>Nelin A. A., Poymalin V. E., Fomenko I. A.</i>	82
Experience Generalisation in Ensuring Failure-Free Operation for Onboard Equipment of Command Radio Links <i>Bulgakov N. N., Avramenko S. V., Zinchenko V. F., Semochkin A. S.</i>	87

---

### **Solid-State Electronics, Radio Electronic Components, Micro- and Nanoelectronics, Quantum Effect Devices**

An Approach to Determining the Demand for Advanced Electronic Components for Space Applications <i>Krasnov M. I., Luk'yanov E. M.</i>	96
